

Configuration: 107.9" BBC
Application: Truck or Tractor
Engine: Cummins B6.7, L9

EQUIPPED JUST RIGHT TO GET THE JOB DONE JUST RIGHT

Winter can be tough on any truck. But no truck has more demands placed on it during the worst weather than the snowplow. The roads need to get cleared. Period. Downtime is not an option. That's why the new International® MV™ Series has been engineered to face the worst winter conditions head-on. Features like built-in corrosion protection provide enhanced durability while the optional 20" integral front frame extension means an 11-foot, 2500-lb plow / hitch can now be installed for maximum road-clearing performance. Plus, with improved visibility (both day and night), breakaway hood mirrors, self-healing ChemGuard-coated floor panels and state-of-the-art active safety features, like optional Bendix® Blindspotter®, MV-Series drivers can hit the road with confidence whether they're confronting the next polar vortex or your run-of-the-mill blizzard.

ChemGuard Coating

Line-X Coating

ChemGuard Coating

This inter-reactive, chrome-zinc phosphate coating is applied on top of the galvanized steel. Its self-healing properties allow the surface to be scratched, cut or perforated and still maintain corrosion protection.

Optional Line-X Coating

This polyurethane and polyurea formulation has earned industry respect for its durable, long-lasting and high-performance qualities. Designed to protect against abrasion, corrosion and impact, this OEM-grade coating can be found on over 4 million pickup bedliners.

E-Coat Paint Process

A No-Compromise Anti-Corrosion Approach

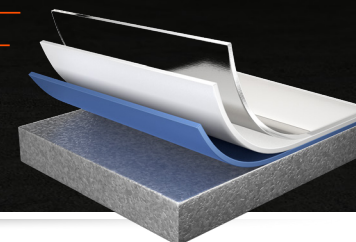

To provide the strength and easy-to-repair qualities of steel with the corrosion resistance severe-duty customers demand, the MV™ Series features a special paint and coating process designed with endurance in mind.

SAFETY

Our commitment to safety can be seen in smart design, engineering and features of the MV Series.

- Thoughtful design with improved forward visibility through a new sloped hood and halogen headlamps can help drivers stay focused
- Available new safety features like optional LED headlights and breakaway hood mounted mirrors combine practicality with style
- Active safety features like optional Bendix™ BlindSpotter® can help drivers do their job and minimize the possibility of an accident

CAPABILITY AND INTEGRATION

Businesses large and small have long relied on the strength and adaptability of the MV Series.

- The new stalk shifter** allows drivers to shift and apply the Jacobs brake without looking down
- International® Diamond Logic® electrical system integrates with the MV Series to deliver custom plow solutions and precise and quicker diagnostics

UPTIME

International is dedicated to making trucks you can count on day-in and day-out

- Engine maintenance intervals are aligned and extended for fewer trips to the service department
- InterCoat® ChemGuard-coated floor panels with the optional Line-X® coated interior floor can help defend against corrosive environments

Optional Bolt-On*	10'	1250lbs	100lbs	1350lbs

APPLICATION SPECIFIC FEATURES

- Front frame extension – 20" integral (no mega-brackets)
- Plow light connection
- Road speed & other wiring in dash
- Road speed & other wiring behind seat
- Heated Windshield
- Front Axle 14.7K
- Front Suspension 14.7K (parabolic taper leaf, shackle type)
- Transmission PTO is available
- Sealed battery terminals
