<td>THIS TRUCK CHANGES THE GAME AND YOUR BUSINESS WINS</td>
<td>ProStar® is a driver's truck. A more productive truck. The most efficient and innovative Class 8 truck on the road.</td>
<td>How did we achieve this? By talking to fleet managers and drivers like you about the challenges you face and the features you need. After all, you’re the ones who turn our trucks into your home offices, the ones who depend on us every day.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The way we see it, setting the pace in the truck industry is all about working together. Day after day. Year after year. Mile after mile. With the goal of keeping your business running at its best.

---

Being a driver’s truck, ProStar features intuitive, easy-to-read gauges and a comfortable, automotive-style steering wheel.
When trucks are your livelihood, fuel is the lifeblood of your business. With heavy-duty commercial trucks running more efficiently than ever, we know that fractional improvements can pay dividends to a fleet’s bottom line.

Introducing ProStar® ES internal testing and fleet results show up to 11 to 13 percent improvement in fuel economy with a ProStar® ES versus a 2010 ProStar with a 13L engine and a 10 speed manual transmission. The ProStar® ES fuel-efficiency package offers the perfect balance of superior aerodynamics and drivetrain optimization to get farther at less cost.

Portfolio of Transmission Options
The ProStar is available with a variety of automated, automatic manual and manual transmission options Allison®, Eaton®, and Tremec®. Automatic and automated transmissions reduce the variance between expert drivers and first-timers by electronically monitoring vehicle speed, grade, weight and more to select the best gear for the engine, maximizing fuel efficiency.
Superior Aerodynamics
The single best way to reduce your fuel costs is to reduce wind resistance. The ProStar® was designed with air resistance in mind, making it the most aerodynamic Class 8 truck on the road today.

Aerodynamic Features:
- Reduced bumper gap
- Wraparound windshield
- Sloped hood design
- Reduced wheel opening
- Optional side extenders for day cabs and sleepers
- Optional full-length chassis skirts with bumper seal on sleepers with 122" BBC

Optimizing Aerodynamics Through Testing
To become the industry leader in aerodynamics International leverages different types of testing to understand the true effect of aerodynamic drag in various types of conditions.

- Computational Fluid Dynamics
- 1/8 Scale Wind Tunnel
- Full Scale Wind Tunnel
- Coast Down
- Over the Road Testing

Better aerodynamics means better fuel economy
With its optional bumper seal, wraparound windshield, and patented day cab roof fairing, ProStar increases your efficiency by reducing air resistance.
Superior Ride, Handling and Maneuverability
Drivers tell us that without a comfortable ride, everything else is a moot point. ProStar® delivers comfort features in spades, including a smoother, quieter ride, improved visibility and more personal storage space.

Ride & Handling Features:
- 4-point, air-over-strut cab suspension, for more comfort
- Standard premium power steering gear reduces wander and provides on-center feel
- Wide-track front axle position, for a tighter turn radius
- Auto-like steering wheel with built-in fingertip controls
Best-In-Class Visibility
Unobstructed sight lines are always important, especially when hauling several tons over long distances at highway speeds. ProStar® provides the kind of visibility features drivers appreciate—and competitive trucks can’t beat.

» Up to 7 ft. better forward visibility
» One-piece, aerodynamic wraparound windshield eliminates center split for unrestricted view of the road
» More windshield wiper coverage for visibility
» Sloped hood
» Lower placed instrument panel
» Oversized sleeper windows

Ultra-Quiet Cab
When you spend 10 hours a day behind the wheel, the vibration and noise of diesel “clatter” can really wear you down. That’s why ProStar is built with features that deliver a quiet cab.

» Strategically positioned engine and cab mounts
» Injection-molded floor insulation over a reinforced steel cab floor
» Improved window and door seals
## Two Powerful Engines, One Class-Leading Truck

As one of the most popular partnerships in trucking, Cummins® and International® have teamed up again to deliver the kind of performance and action that ProStar® customers have come to expect from the most efficient and innovative Class 8 truck on the road. The Cummins ISX15 offers:

- Impressive fuel economy
- Broad range of horsepower options
- 550 life of over 1 million miles
- Widespread service and support network

### Navistar N13 Features:

Now with selective catalytic reduction technology (SCR), the N13 delivers the same Big Bore characteristics with enhanced reliability and performance. Other N13 features include:

- Compacted graphite iron (CGI) engine block
- High strength without added weight
- Low noise vibration and harshness
- Excellent power characteristics
- Outstanding fuel economy
- Over 130 programmable parameters for optimized performance
Cummins Aftertreatment System

The N13 and Cummins ISX15 engines use selective catalytic reduction technology (SCR) to reduce emission levels. Both engines leverage the proven Cummins Aftertreatment System to remove particulate matter and nitrogen oxides (NOX). Used across North America and thoroughly tested under the most extreme conditions, Cummins offers unrivalled emissions technology experience.

Navistar® N13 Specs
Along with performance ratings comparable to many higher displacement engines, the N13 delivers outstanding fuel economy and proven capability.

MAINTAINING YOUR TRUCK HAS NEVER BEEN SO EASY

Of all the trucks on the market, ProStar® is the easiest to service and maintain. In fact, it features numerous innovations in all, which contribute significantly to vehicle uptime and low cost of ownership.

<table>

The Diamond Logic® Advantage
With Diamond Logic®, the engine, transmission, instrument panel and other key vehicle components are in continuous communication with each other electronically. By monitoring critical vehicle functions and relaying information to the driver, it ensures efficient vehicle operation in real world applications.

Convenience through Diamond Logic:
- Automatic pre-trip light test
- Park brake alarm
- Lights on with wipers
- Dome light timeout with key off
- Head lights left on alarm
- Sleeper load shedding
- Auto start stop

This self-diagnosing and self-monitoring system, allows drivers and technicians to accurately pinpoint electrical problems, for quicker troubleshooting and repairs.

Operational Benefits:
- Increased reliability and uptime
- Reduced repair costs
- Maximized profit
- Helps meet CSA regulations

Safety and Interlock Protection:
- Diff Locks release above 25 MPH
- Suspension dump only below 10 MPH
- Doors lock automatically above 5 MPH
- Automatic head lights on at dusk
- Work lights turn on in reverse
- Fifth wheel slide and jaw release with safety interlocks
- Intelligent start with over crank protection

Diamond Logic Features:
A stored record of programmed electrical circuit configuration, for future reference in troubleshooting of updating systems, prevents undue travel and labor costs when repairing vehicle.

Reliability and life expectancy are increased with low current components and long-life LEDs for gauge cluster warning lights and switch indicators, maximizing uptime. LED lights are standard on all exterior lights except work light.

Onboard diagnostics monitor electrical modules. Trouble codes are shown on the LCD display and stored in the system for quick troubleshooting and increased uptime.

A full range of pre-programmable features, including pre-trip inspections (e.g., a light check function) that help drivers manage CSA regulations.

Vehicle interlocks, which are operational limits and rules within the electrical system, can be set to avoid costly damage or injury to the vehicle, the equipment or the operator.

With over 700 dealer locations and over 8,000 service technicians across North America, International is committed to keeping you on the road.

ProStar® features easy access and fill points.
TAKE COMMAND OF YOUR BUSINESS

In order for your business to run at its best, your trucks must be running at their best. That’s why we created OnCommand, the most customer-friendly package of service solutions in the industry.

With an arsenal of business tools to choose from, OnCommand helps you achieve more efficient repairs and maintenance, better lifecycle value, and an overall lower total cost of ownership. Ultimately, it gives you better control of your business.
**The Three Categories of OnCommand™ Solutions**

### Knowledge
- **OnCommand Service Information**: A centralized, VIN-based, online source of parts and service information for fleet managers and technicians. Facilitates faster, more accurate diagnosis, repair and maintenance.
- **OnCommand Parts Information**: This web-based catalog provides instant access to parts lists. Includes illustrated parts breakdown diagrams, for easier parts identification. Shows real-time parts availability.

### Control
- **OnCommand Connection**: Be more in tune with your fleet than ever before. Using the connection of virtually any telematics provider, you can access real-time vehicle health, prioritize repair and maintenance work and get back on the road more quickly.
- **OnCommand Service Partner**: This dealer-provided maintenance and repair program provides fast, accurate repair estimates, fixed labor times for specific repairs, and expedited service.
- **OnCommand Repair Advocate**: Web-based case management system enables expedited vehicle repair by connecting customers, dealers and Navistar support groups into one communication stream.
- **OnCommand Fleet Charge®**: This powerful purchasing card program gives customers guaranteed pricing, consolidated billing, customized accounts and parts information. Helps manage parts and service expenses.
- **OnCommand Preventive Maintenance**: This program ensures that vehicles get the best parts, premium Maintenance oil and filters, and exclusive service from factory-trained, certified technicians. Purchase by job or for extended periods.
- **OnCommand Parts Return**: An industry-unique program to return unused parts (whether Program excess or obsolete), regardless of make, with the potential for full reimbursement at fleet cost.

### Education
- **OnCommand Education**: Vehicle maintenance education solutions for technicians, operators and fleet managers, including both web-based courses and instructor-led training at local training centers.

---

OnCommand Connection works with over a dozen telematics service providers to provide remote diagnostics.

Trust your International dealer to provide you with factory-trained preventive maintenance and inspections to help you achieve the maximum life from your truck.
Interior comfort and convenience are a big reason ProStar® is the most driver-friendly truck in Class 8. With drivers’ feedback in mind, ProStar features plenty of creature comforts and improvements to help them feel more at home on the road.
Front of Cab Features:
- Available cabinet behind the passenger seat is perfect for a pull-out cooler
- Advanced ergonomic design ensures pedals, steering wheel and shifter knob are easily accessible
- Increased foot room adds comfort during long hauls

Driver information display includes Bluetooth and an integrated microphone in the headliner

Back of Cab Features:
- TV and DVD combinations include an optional TV mount for hanging your flatscreen, along with premium audio offered with the Monsoon sound system
- Easy to clean soft touch vinyl wall, back, and ceiling materials repel smoke and odors and enhance resale value
- Customized storage options for the back of your cab including wrap-around sleeper storage, overhead airline-style cabinets, multiple wardrobe options, tower cabinets and secured storage under bunk

Multiple configurations are available, including 56” and 73” sleeper lengths in low, high and skyrise configurations
- Optional MaxxPower battery powered HVAC system provides 17,000 BTU heating, 6,000 BTU cooling output, and 10+ hours of “on” time
## Serviceability
